| State Surcharge = Project Valuation x .05% (.0005) | | | |
| I hereby apply for a plumbing permit and acknowledge that the information above is complete and accurate. I understand that this is not a permit and work is not to start without a permit. I understand that the permit will expire if the work does not begin within 180 days or is suspended at any time for 180 days. I acknowledge that I am responsible for all required inspections and to ensure all work is in compliance with the ordinances of the Scott County and the laws of the State of Minnesota. | | | |
| Applicant Signature Must be signed by Master Plumber if applicant is not the homeowner | | | Date |

SMOKE AND CARBON MONOXIDE ALARMS SHALL COMPLY WITH CURRENT STATE CODE UP TO A \$150 FEE MAY BE CHARGED IF NOT COMPLIANT!!

MN State Residential Codes R314 & R315 require carbon monoxide detectors & smoke alarms to be in compliance with current codes. The permit holder is responsible to ensure compliance prior to inspection being scheduled. Inspection failure resulting from non-compliant smoke alarms or carbon monoxide detectors will result in re-inspection fees.

To avoid additional fees, install smoke alarms & carbon monoxide detectors as required by Minnesota Residential Building Code

WHEN & WHERE:

R314 - Smoke Alarms shall be installed in the following locations:

1. In each sleeping room.
2. Outside each separate sleeping area in the immediate vicinity of the bedrooms.
3. On each additional story of the dwelling, including basements & habitable attics, but not including crawl spaces and uninhabitable attics.

All smoke alarms shall be listed and labeled in accordance with UL 217 and shall be upgraded to meet current codes when alterations, repairs, or additions requiring a permit occur (including installation or replacement of windows or doors).

Hard wiring of smoke alarms in existing areas shall not be required where the alterations or repairs do not result in the removal of interior wall or ceiling finishes, unless there is an attic, crawl space or basement available which could provide access for hard wiring without the removal of interior finishes.

R315 - Carbon Monoxide Alarms:

Where work requiring a permit occurs in existing dwellings that have attached or fuel-fired appliances, carbon monoxide alarms shall be installed outside of and not more than 10 feet from each separate sleeping area or bedroom. Alarms shall be installed on each level containing sleeping areas or bedrooms. Single-station carbon monoxide alarms shall be listed as complying with UL 2034 and shall be installed in accordance with this code and the manufacturer's installation instructions.

Exceptions:

Smoke Alarms: not required to be upgraded if the permit is for exterior work only; or the installation, alteration, or repairs of plumbing, electrical, or mechanical systems.

Carbon Monoxide Alarms: No Exceptions
